Please pray for Dr. Mohler

Friday, January 5, 2007

Dr. Mohler's health has sustained a setback. Over the past 36 hours Dr. Mohler has suffered from unrelenting pain. This unusual degree of pain signaled concern for the attending physicians and prompted additional tests this afternoon. In the past hour these tests have revealed that Dr. Mohler is suffering from pulmonary emboli in both lungs. His condition is quite serious and he has been moved to the intensive care unit of Baptist East Hospital in Louisville, KY for immediate treatment.

Please make this a matter of urgent prayer. Thank you once again for your concern and support during these days.
