Dr. Mohler released from the hospital

Wednesday, January 10, 2007

Dr. Mohler was discharged this morning from Louisville's Baptist Hospital East. After a two week hospitalization that included extensive abdominal surgery and a four day stay in the Intensive Care Unit due to pulmonary emboli in the lungs, he and the family are overjoyed to be back home.

Dr. Mohler looks forward to resuming his presidential and ministerial duties, but his activities will be limited for some time as he continues his recuperation at home.

The Mohlers are deeply grateful for the many prayers offered and expressions of concern shown over the past couple of weeks.
